

# LAND & WATER

Innovation. Inspiration. Results.

## HEATHER FARM WETLAND HABITAT

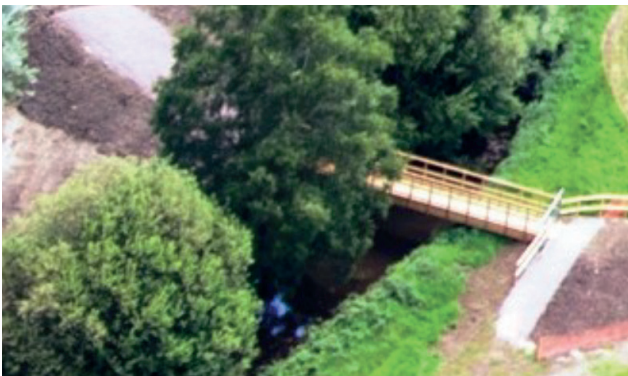

Land & Water were involved from the very beginning of this project as ECI consultants and as a result, saved the client 25% on the total cost of the project.

The creation of a wetland habitat from a 17 acre old mushroom farm near Woking in Surrey also realised huge cost savings and brought the local community together to help with planting, resulting in a much-loved public space.

### Project Delivery

- Scope of works included bulk earthworks, creation of new wetlands, new pathway construction, installation of boardwalks, dipping platforms and reed bed filtration beds
- New timber pedestrian bridge across the River Bourne

Horsell Common Preservation Society relied on Land & Water's expert advice for the design of the scheme and were naturally delighted when the project came in at £374,000 against a £500,000 budget.
