

## GLOUCESTER DOCK CUTTER SUCTION DREDGING

As part of the Canal & River Trust's dredging programme within Gloucester Dock, Land & Water was contracted to carry out cutter suction dredging of the main basin and approx. 500m of the Gloucester-Sharpness Canal.

### Project Delivery

- Land & Water contracted specialist dredging equipment from Holland to complete the works. This was specifically requested by the client.
- Land & Water liaised with a ship builder within the dock in order to obtain use of the drydock for disposal of dredging material into the River Severn.
- Tides on the River Severn created non dredging windows throughout each day. This meant that Land & Water had to plan its time effectively in order to achieve maximum productivity on this project.

### Project Particulars

- Client: Canal & River Trust
- January 2019 – March 2019
